SKYROCKET BY GAS EXPLOSION

Bosinees Blown From Barge's Through Hatch-

Into Canal .

byed by the Pure Oil Company, & concern, played the part of a Gowanus Canal to-day. He was blown, his clothes shisse, from the hold d oil in cases through the hatchway, across the deck and out into the mi, where he floated around on the warmy surface for two minutes before was picked up and started for Long Bland College Hospital. He is in a bad condition from burns and shock.

Felltrenn had charge of the pump of through the canal in tow of a tug. Jus below the Hamilton avenue bridge he went into the hold to start the gasoline engine which furnishes power for the pump. The engine and pump are in little steel lined compartment aft, enthrely shut off from the cargo space o the barge. To start the engine an electric spark is generated with a crank.

It appears that the compartment was

filled with oil fumes which were held down by the heavy outer atmosphere when the hatch cover was lifted. Felltrenn climbed down an iron ladder. grabbed the crank and began to turn it. He soon generated a spark, but the epark had an effect more pronounced than that of starting the engine. It communicated to the gas in the compartment, which blew up with a loud report.

Feiltrenn's clothing, which was soaked with oil from his work around the barge, caught fire. Those in the vicinity whose attention was attracted by the explosion saw the unfortunate engineer shoot out of the hatchway rail of the barge. He was ablaze from head to foot.

It takes a lot to break the surface of Govanus Canal, but Felltrenn, from the force of his long drop, went through and the water drowned the fire in his clothes. The captain of the tug Irene, towing the barge, started to his assist-

ance and he was dragged aboard and hustled to shore.

Feltrenn's body was one blister. His hair and eyebrows were scroched off. There were ro broken bones, however, as his departure from the hold of the barge was as clean as the progress of a bullet from a rifle. The hospital surgeons say they can pull him through.

Mrs. Samuel Decker of Seneca, Falls, N. Y., is a living example at 107 years of age of what a pure tonic stimulant and invigorator will do for old people. Mr. Decker, her husband, in an

interview on January 24th with our correspondent, said: "I want to tell you that Mrs. Decker is using your medicine. She is 107 years of age. We know that it has done her a great deal of good. It is a wonderful medicine, and we could not get along without it. We will tell all old people to use it, and we want every one to know what it has done for us. It is the only thing that keeps Mrs. Decker alive. We send you her picture and you can publish this letter in any paper you wish
